

Fonix to Support Next-Generation Intel® XScale® Processors

Fonix demonstrates speech capabilities on current Intel® XScale® processor at 3GSM 2006

Salt Lake City, Utah (February 13, 2006): Fonix Speech, Inc., a wholly owned subsidiary of Fonix Corporation (OTC BB: FNIX) specializing in speech interfaces for mobile devices, handheld electronic products, and systems and processors, will preview Fonix Speech™ voice recognition speech dialing technologies for Smartphones and PDAs using the Intel PXA27x processor on the show floor at 3GSM World Congress 2006 Barcelona, Spain. Fonix announces support for future phone platforms using next generation Intel® XScale® processors.

“Optimized for the next generation Intel® XScale® application processor family, Fonix Speech™ can provide a user friendly, natural speech interface for cellular and handheld devices,” stated Gary Forni, Director of Handheld Platform Software Enabling, Intel Mobility Group. “An easy to use voice-dialing capability is important to users.”

“Fonix’s speaker-independent voice dialing software on next generation Intel® XScale® application processor based handheld devices, enables seamless voice interface command dialing. The small memory footprint of Fonix Speech™ technology on the next generation Intel® XScale® application processor will allow device manufacturers to embed accurate, user-friendly speech interfaces into powerful handheld devices like mobile phones, PDAs, and other electronic devices and consumer gadgets,” says Walt Nawrocki, Senior VP and GM, The Fonix Speech Group.
