

New Football Videogame Featuring Fonix VoiceIn Hits Retail Shelves Today

First videogame shipped with voice recognition on three gaming platforms

SALT LAKE CITY, UT (June 20, 2006) Fonix Speech, Inc., a wholly owned subsidiary of Fonix Corporation (OTC BB: FNIX) specializing in embedded speech interfaces for mobile devices, handheld electronic products and systems and processors, announces the availability of the first videogame of 2006 featuring the Fonix VoiceIn® Game Edition voice recognition interface for the Xbox®, PlayStation®2 and PC platforms.

Available in retail outlets today is the first-ever videogame to feature Fonix's voice command and control functionality on three gaming platforms. Game developers incorporated Fonix VoiceIn to provide players with a speech interface to control certain aspects of game play. With the use of a headset, players can direct game play, including commands to the players, with their voice.

"Today's game release is a significant event for Fonix as it's the first time we've seen a videogame simultaneously released on all three major gaming platforms," says Tim K. Hong, VP of Games, Fonix Speech. "It's exciting for Fonix to see the results when creative game developers incorporate our voice recognition technology in fun, new ways. Football and other team sports games are a perfect way to use voice recognition and increase the excitement and realism of the game environment for players."
