

Fonix and A.I. Corporation Demonstrate Speech Command and Control for Automobiles at ESEC

Fonix showcases its speech recognition solution for vehicle telematics systems

SALT LAKE CITY, UT (June 27, 2006) Fonix Speech, Inc., a wholly owned subsidiary of Fonix® Corporation (OTC BB: FNIX) specializing in embedded speech interfaces for mobile devices, handheld electronic products, and systems and processors, will be demonstrating its automatic speech recognition (ASR) for automobiles and other text-to-speech (TTS) solutions with A.I. Corporation inside the A.I. booth # 12-35 at the Embedded Systems Expo and Conference (ESEC) in Tokyo, Japan, June 28 – 30, 2006. ESEC is one of Japan's largest electronics shows, attracting hundreds of consumer-oriented companies looking for state-of-the-art technology.

“A.I. is pleased to feature Fonix speech interfaces as part of our marketing efforts at ESEC,” says Hiroyuki Kato, President, A.I. Corp. “A.I. prides itself on offering only the latest state-of-the-art technology to our customers developing electronic devices. Fonix speech recognition and text-to-speech provide cutting edge interface opportunities for developers. Fonix's commitment to constant improvement and superior technology matches A.I.'s philosophy and mission for our customers.”

Fonix representatives will be demonstrating Fonix ASR speech technology for automobiles. The Fonix speech-recognition-based solution works as a natural voice interface inside a car for conveniently controlling and managing systems like navigation, climate control, personal information, Internet and cell phone access. Fonix provides an intuitive, user-friendly interface that allows drivers to access phone contacts and information via their voice.

“The Fonix telematics solution allows application developers in the auto industry to easily add convenient, accurate speech recognition capabilities to in-car functions and systems,” says Walt Nawrocki, Senior VP and GM, Fonix Speech. “ESEC provides a wonderful opportunity for Fonix to showcase our easy-to-use speech recognition for systems and electronic devices, which allow manufacturers to create user-friendly interfaces for complex systems such as those involved in automotive telematics.”

A.I. Corporation and Fonix Speech, Inc. offer software solutions for a broad range of industries and products including consumer electronics devices, automotive telematics, digital office equipment, communication and network equipment, industrial control and factory automation, and other industries utilizing embedded microprocessor-based systems.
