

Leading Asian Electronic Dictionary Manufacturers Adopting Fonix Text-to-Speech Solution

OEMs now delivering e-dictionaries in Asia and Europe

SALT LAKE CITY, UT (June 19, 2007) Fonix Speech, Inc., a wholly owned subsidiary of Fonix® Corporation (OTC BB: FNIX) specializing in embedded speech interfaces for mobile devices, handheld electronic products, video game consoles, data base systems and processors, announces unit volume and royalty sales increasing in Asia from Fonix text-to-speech (TTS) solutions for electronic dictionaries.

Electronic dictionary manufacturers incorporating Fonix text-to-speech technology now include Casio Computer Co., Ltd.; Canon; Seiko Instruments, Inc.; Shenzhen Huapu Electronic Technology Co., Ltd. and several other Asian-based original equipment manufacturers (OEMs). At this same time last year, only one major e-dictionary manufacturer was shipping units with Fonix TTS. Today, six OEMs are shipping units with Fonix TTS, and three additional manufacturers expect to deliver products prior to the end of 2007.

Additionally, dictionaries featuring Fonix's intelligible TTS solution are now sold in over six countries including Japan, China, Korea, France, Germany and the Middle East. The number of units sold YTD has increased more than 155 percent over the same period last year.

"The market reaction in Asia for handheld dictionaries enabled with Fonix speech interfaces has been remarkably positive," says John Shepherd, Director of Asian Sales. "Demand for Fonix technology has exceeded our original expectations for 2007; and sales of e-dictionaries remain brisk throughout the region. By concentrating our sales and relationship-building efforts on key manufacturers of these devices, the handheld 'talking' dictionary market provides a steady increase in recurring quarterly revenue."

In 2007, 39 new device models have been introduced by multiple manufacturers. For the comparable period last year there were approximately 20 models in the market, representing nearly a 100% increase so far this year. Fonix anticipates supplying TTS solutions for five to six additional new models by the end of this year. The Company receives unit royalties from each device sold.
