

# Fonix iSpeak™ for the Apple iPhone™

## Accurate, Productive and Safe

*iSpeak assists users to comply with hands free regulations with the iPhone*

**SALT LAKE CITY, UT (October 21, 2008)** Fonix Speech, Inc., a wholly owned subsidiary of Fonix® Corporation (OTC BB: FNIX) specializing in embedded speech interfaces for mobile devices, handheld electronic products, video game systems and processors, sells Fonix iSpeak™ for the Apple iPhone™. Fonix iSpeak is gaining user acceptability as a productive, safe, hands free voice interface to the iPhone. Many states and countries require hands free use of mobile devices – Fonix iSpeak makes compliance much more safe and easy. Used with the Apple ear buds, Fonix iSpeak allows hands free use in the noisy environment of the car.

Fonix iSpeak users recently reported:

- “Voice prompts make this the only voice dial app that is useful in the car. It imports your contacts once, the first time you use it, so it opens more quickly on subsequent uses – even if you have a lot of contacts. The voice recognition is great....”
- “I’ve been anxiously awaiting the release of this application. When I first heard about it I was a little skeptical, but all of my skepticism has been laid to rest. I’ve purposely tried getting it messed up by using it in my car, walking around outside with other people around, etc, but it’s been 100% accurate, even with some pretty complicated last names.....”

Fonix iSpeak can be purchased for US\$14.99 through the Apple iTunes App Store™ in the Productivity and/or Utilities category. Fonix iSpeak is available in English for both the original and 3G models with iPhone OS 2.0 or later

“We are pleased with the initial user acceptance. Fonix iSpeak is gaining market acceptance and becoming the voice interface of choice for the iPhone,” says Steve Jones, Fonix senior sales executive. “Accuracy is essential as well as ease of use, especially in a hands free environment. iSpeak purchase and download through the App Store is easy and quick, follow the instructions and iSpeak delivers. ”
