

Fonix iSpeak™ 1.4 Now Available for iPhone™ 3.0

Intuitive Voice Recognition Application Supports iPhone 2G, 3G and 3GS Devices

LONDON, UT (July 30, 2009) – Fonix Speech, Inc., a wholly owned subsidiary of Fonix® Corporation (OTC BB: FNXC) specializing in embedded speech interfaces for mobile devices, handheld electronic products, video game systems and processors, today debuted Fonix iSpeak™ 1.4 for the Apple iPhone™ 3.0 operating system.

Fonix iSpeak provides voice dial by name or number with highly accurate speech recognition software (especially in noisy environments) and voice confirmation using recorded speech together with text-to-speech. Fonix iSpeak allows for nearly hands-free use, no buttons to hold while speaking, and quick integration of names and numbers from your contact list.

“While the iPhone 3GS recently introduced its own voice-recognition function, Fonix iSpeak works with any model of the iPhone,” said Fonix CEO Roger Dudley. “iSpeak was designed to manage more contacts and deliver a higher level of professional quality voice control than other technologies on the market.”

Fonix iSpeak 1.4 includes the following new features and functions:

- Highly accurate when used in a vehicle. iSpeak is more accurate than the Voice Control software in the 3GS.
- Easily manages expanded number of contacts.
- Delivers professional quality voice prompts, improving the output sound.
- Compatible with Apple’s new and improved iPhone 3.0 audio functionality.
- After updating to the new iPhone 3.0 OS, current iSpeak users receive a free update to iSpeak 1.4 (the Voice Control software on the new iPhone 3GS is not available for 2G and 3G phones).
- iPhone 2G, 3G and 3GS users wanting the benefits of Fonix iSpeak may purchase iSpeak 1.4 through the Apple AppStore.

Fonix iSpeak runs on the device, eliminating time delays by processing the speech signal through an off-site server. The program does not record names and numbers on a public server, nor requires holding buttons on the iPhone when in use.

Fonix iSpeak can be purchased for US\$2.99 through the Apple iTunes App Store™ in the Productivity and/or Utilities category (www.apple.com). Fonix iSpeak is available for 2G, 3G and 3GS models with iPhone OS 3.0. For more information go to www.fonixspeech.com or call (801) 553-6600 and say “iSpeak support” or “sales” for demos, availability and pricing.

About Fonix:

Fonix Corporation (OTC BB: FNXC), based in Salt Lake City, Utah, currently operates through its wholly owned subsidiaries, Fonix Speech, Inc., and Shanghai Gaozhi Software Systems Limited. Fonix Speech is an innovative speech recognition and text-to-speech technology company providing voice solutions for mobile/wireless devices, interactive video games, toys and appliances, computer telephony systems, the assistive market, and automotive telematics. Fonix Speech also provides developers and manufacturers with cost-effective speech solutions to enhance devices and systems.

Shanghai Gaozhi Software Systems Limited (“GaozhiSoft”), based in Shanghai, China, is a leading provider of OSS (Operation Support System) and related software solutions to Chinese mobile network service providers. Founded in 2003, GaozhiSoft software is integrated and widely used in 2G and fixed line networks. In 2008, GaozhiSoft expanded its strategy to include operations as a value-added service provider in the 3G mobile network in China and throughout the Asia Pacific region.
